mile finds the state of the sta

1. A stationary exercise bicycle comprising:

a frame comprising a front socket, a rear socket, and a down tube coupling the front socket to the rear socket; and

a deflector coupled to the front socket extending toward the down tube for preventing damage to the bicycle caused by corrosive sweat falling from a rider.

- 2. The stationary exercise bicycle according to claim 1 further comprising a flywheel casing disposed proximate the down tube, wherein the casing substantially encapsulates working parts of the bicycle for preventing damage to the bicycle caused by corrosive sweat falling from a rider.
- 3. The stationary exercise bicycle according to claim 1 further comprising wheels coupled to the frame for ease of portability.
- 4. The stationary exercise bicycle according to claim 1 wherein the down tube is mounted directly to the rear socket.
- 5. The stationary exercise bicycle according to claim 1 wherein the20 down tube is rectangular in shape.
 - 6. The stationary exercise bicycle according to claim 1 wherein the deflector is a unitary plastic member.

7. The stationary exercise bicycle according to claim 1 wherein the deflector is mounted underneath a front fork triangle extending from the front socket.
